Cardiovascular Institute of Philadelphia

2012-2013
CME Conference Calendar

- Up to 35 total CME/CEU Credits Available
  - Echo and Nuclear Specific Credits
  - Impressive faculties of national thought leaders and regional experts
    - One-day programs
  - Conveniently located in Philadelphia
  - Comfortable locations, delicious meals included

Inaugural Interventional Cardiovascular Medicine: The State of the Art 2012  
Sunday, September 23, 2012

19th Annual Cardiology Update: Clinical Management of Heart Disease 
Sunday, October 28, 2012

5th Annual Echocardiography Update 
Sunday, January 20, 2013

2nd Annual Electrophysiology Update 
Sunday, February 24, 2013

9th Annual Update in Nuclear Cardiology 
Thursday, March 21, 2013

2012 Programs

CVI's Inaugural Interventional Cardiovascular Medicine: The State of the Art 2012
Sunday, September 23, 2012
Hyatt Regency Philadelphia at Penn’s Landing

For Clinical and Interventional Cardiologists, Cardiothoracic Surgeons, Emergency and Internal Medicine Physicians, Interventional Radiologists, Fellows, Residents, Nurse Practitioners, Physician Assistants, Nurses, Cath Lab Staff and Hospital Administrators interested in reducing door to balloon time.

Focusing on new diagnostic modalities for vessel characterization, changing approaches for vascular access, advances in carotid revascularization, shifting paradigms in STEMI care, intervention in high risk patients with left main disease, and the burgeoning field of transcatheter valve therapy; all of which contributes to the ever expanding choices available to clinicians.

CVI’s 19th Annual Cardiology Update: Clinical Management of Heart Disease 2012
Sunday, October 28, 2012
Hyatt Regency Philadelphia at Penn’s Landing

Keynote Presentation:
Nanette Wenger, M.D.
Emory University School of Medicine

For physicians, fellows, residents, mid level providers and allied health professionals caring for patients with cardiovascular disease

Providing updates on the diagnosis, treatment, management and prevention of cardiovascular disease and concomitant conditions. Our 2012 agenda focuses on gender disparity in CVD; new developments in management of dyslipidemia; managing side effects of statin therapy; diabetes, metabolic syndrome, obesity, chronic kidney disease and CV risk; supplements and nutraceuticals; pharmacologic management of atrial fibrillation; maximizing effectiveness and minimizing potential complications of ICD therapy; interventional and medical management of acute coronary syndrome.

2013 Programs

CVI's 4th Annual Echocardiography Update
Echo Specific CME and SDMS credits
Sunday January 20, 2013
Loews Philadelphia Hotel

For physicians, sonographers, fellows, residents, mid level providers and allied health professionals caring for patients with cardiovascular disease

Keynote Presentations:
Gary Mintz, M.D. – Cardiovascular Research Foundation
Howard Herrmann, M.D. – Perelman School of Medicine; University of PA

Highlighting the use of echo in the clinical office, the cath lab and the OR

Reviewing updated appropriate use criteria; highlighting the use of echo in the clinical office for evaluating ischemic heart disease, aortic stenosis, aortic insufficiency, mitral regurgitation, aortic root disease; and on the post-valve surgery patient.

Discussing the use of echo in the Cath Lab using IVUS, ICE and TEE; and use of echo in the OR for TAVR, Aortic Root Disease and PFO Closure.

CVI’s 2nd Annual Electrophysiology Update
Sunday, February 24, 2013
Loews Philadelphia Hotel

For physicians, fellows, residents, mid level providers and allied health professionals caring for patients with cardiovascular disease

Highlighting the newest approaches for recognition, diagnosis and management of patients at risk for clinically significant arrhythmias.

Various diagnostic tools including ECG, MRI, MPI, Echo, genetic testing, electrophysiologic testing and signal processed electrocardiography will be discussed. Pharmacologic, implanted device and ablative management strategies will also be presented.

The course is designed to improve recognition of common and more-recently described unique arrhythmia syndromes which will facilitate appropriate treatment and referral when appropriate.

CVI’s 9th Annual Update in Nuclear Cardiology
Nuclear Specific CME and VOICE credits
Thursday, March 21, 2013
Hyatt Regency Philadelphia at Penn’s Landing

Keynote Presentations:
E. Gordon DePuey, M.D. – Columbia University College of Physicians and Surgeons
Thomas Holly, M.D. – Northwestern University – Feinberg School of Medicine
Prem Soman, M.D. – University of Pittsburg Medical Center

For physicians, nuclear technologists, fellows, residents, mid level providers and allied health professionals caring for patients with cardiovascular disease

Didactic and patient case presentations designed to further the application, management and clinical interpretation skills of healthcare professionals in non-invasive nuclear cardiac imaging. Our 2013 agenda focuses on patient-centered imaging; newer application of radionuclide imaging in heart failure; SPECT QC and its affect on image quality; CABG for ischemic cardiomyopathy: lessons learned from the STICH trial; new technologies, pharmacology, cameras and protocols; radiation reduction; and navigating the road to pre-approval: charting, pre-authorhs and peer-to-peer.
